

**The first all-Russian rating of scrap recycling companies will be presented at the international forum in Moscow.**

In the beginning of 2016 RUSLOM.COM association will present the first all-Russian rating of scrap metals recycling companies. The aim of the rating is revealing the leaders and the most reliable companies in the market.

The results of the rating will be announced at the 12 International forum "Ferrous and Non-Ferrous Scrap Metals" which will be held on 29 February-01 March 2016 in Moscow, Russia. The forum will be attended by more than 600 participants from 30 countries. So far companies from Russia, Kazakhstan, Ukraine, Estonia, Lithuania, USA, Germany, Italy, Spain, France, Denmark, UK, Sweden, Netherlands, Turkey, and China have confirmed their participation.

The information taken from media and analytical reports is usually not enough for finding new partners, entering new markets, and making forecasts. The most efficient way is live networking at business events. The forum in Moscow provides an excellent opportunity of international networking.

Participants from Russia will represent all regions from North-West to Far East and South Federal District.

Among the regional authorities that have confirmed their participation in the forum there are the Ministries of Industry of Saint Petersburg Region, Murmansk Region, Novosibirsk Region, Stavropol Territory, Volgograd Region, Kirov Region, Orenburg Region, Buryatia and Mariy-El Republics, and the Ministry of Economic Development of Volgograd Region, as well as the Governments of Voronezh Region, Vladimir Region, Kostroma Region, Kaliningrad Region, Kursk Region, and Orel Region.

The winners of the «Best in Scrap Metals Market» awards will be determined in accordance with the rating results and awarded at the special ceremony at the forum with the participation of special guests and officials.

**Key features of the forum in 2016:**

- Industrial exhibition.
- Participation of more than 600 key players of Russian and international scrap metals markets who will tell about the market development strategy and make forecasts for the next 5 years.
- Signing of the application to the Government against the ban for scrap metals export from Russia.
- Networking and meetings of Russian and international participants.
- Development and discussion of industrial standards.
- Cancellation of licensing in scrap recycling business and introduction of obligatory self regulation.
- Cancellation of the personal income tax for the individual scrap collectors.
